

Venus and Mars

Women from Venus, Men from Mars!
It was a paperback with stars;
said it's such a glowing read,
tells you everything you need
to understand the space
between a woman and a man!

CHORUS:

*Woman from Venus can't you see
that you were meant for me!
I tell you this man from up on Mars
will light your eyes with captured stars!
And make the moonlight
flow around with golden glow!
No need to tarry, take it slow;
we've got a long, long way to go!
Take my hand, see heaven's glow!
Woman from Venus, don't you know,
this man from Mars will love you so!*

Well I read the whole thing through,
and I learned a thing or two,
about the different points of view
between a woman and a man!

Still it seems to me they're too caught up,
in all the differences they brought up!
We know that we are different -
that would sure be hard to miss!

But that's what makes love magic -
the whole world in just one kiss!

CHORUS:

*Woman from Venus can't you see
that you were meant for me!
I tell you this man from up on Mars
will light your eyes with captured stars!
And make the moonlight
flow around with golden glow!
No need to tarry, take it slow;
we've got a long, long way to go!
Take my hand, see heaven's glow!
Woman from Venus, don't you know,
this man from Mars will love you so!*

I know now that they want us
to meet there in the middle,
to change our ways
and solve the riddle -
The ancient puzzle of a man and woman's love!

Don't be robbed of all the passion,
of the glory and attraction,
that makes Man Mars and Woman Venus!
Don't let science come between us!

Let the magic come and free us
from all these earthly bonds!
I'm glad that you're from Venus -
I'm from Mars!

CHORUS:

*Woman from Venus can't you see
that you were meant for me!
I tell you this man from up on Mars
will light your eyes with captured stars!
And make the moonlight
flow around with golden glow!
No need to tarry, take it slow;
we've got a long, long way to go!
Take my hand, see heaven's glow!
Woman from Venus, don't you know,
this man from Mars will love you so!*
